

IUPUI Campus Health
Description of Fees
August, 2016

IUPUI Campus Health (CH) intends to utilize commercial insurance as much as possible in order to provide care to IUPUI students. Use of commercial insurance allows Campus Health to minimize reliance on General Fee funds. Use of commercial insurance allows provides the best opportunity for sustainable funding into the future.

IUPUI CH is in-network for the following insurance companies:

Aetna
Anthem
Cigna
Humana
Sagamore
UnitedHealthcare

By being in-network with plans from these companies, CH can provide services to students at lower costs than out-of-network providers. One example is preventive care services. Preventive care services include one comprehensive physical exam per year, vaccinations and contraception. Such services are provided at no out-of-pocket costs to students with in-network insurance.

IUPUI CH is obligated to charge the same fee to all students, regardless of insurance status. Our fee schedule is lower than the majority of other providers in Indianapolis. However, we realize our fees may still seem high. For example, our fee for a provider visit for a new patient is usually \$115. Our fee for a provider visit for an established patient is usually \$95. Both of these fees may be higher if the visit is more complex than usual. Physical exams solely for school or work will be \$45 as a benefit to you because insurance does not cover school or work physicals.

In order to reduce the burden on students, we have implemented a Fee Reduction process. Students who meet any of the following criteria may qualify for a fee reduction:

No insurance
Insurance for which CH does not bill (e.g. Medicare or Medicaid)
Demonstration of Financial Need (based on Estimated Financial need as determined by IUPUI Student Financial Services)

Students without insurance or with insurance for which CH does not bill may have their fees reduced to the allowable charge for the most common insurance plan we accept (approximately \$60-75). Students who meet the demonstrated financial need criteria will have their provider visit charge reduced to \$25.

If you feel that you are in financial hardship and/or meet these criteria for fee reduction, we strongly advise you to request Consideration for Fee Reduction by initialing the appropriate paragraph on the General Consent/Guarantee of Payment/Acknowledgement of Notice form.
