Campus Housing Immunization Requirements

For the protection of students, faculty, and staff, all students living in campus housing must meet established health requirements. **IMMUNIZATION DOCUMENTATION IS DUE AT THE MOVE IN DATE!**

Please print the Immunization Checklist, ensure all required and applicable documentation is attached, and send the documents to IUPUI Campus Health as follows:

Scanning: healthsv@iupui.edu  OR  Fax: 317-278-6929

*PLEASE NOTE - When corresponding via email, include Last Name, First Name, and Campus Housing in the Subject Line*

1. **Immunization Checklist Form:**

**Copies of clinical records MUST be attached for each vaccine or lab test to be considered VALID.**

- **Measles, Mumps, Rubella (MMR)** – Proof of 2 vaccinations at least 28 days apart OR proof of an immune antibody titer for EACH disease is required. *If you have received individual vaccinations for Measles, Mumps, or Rubella, proof of 2 vaccinations for each individual disease is required.*

- **Tetanus/Diptheria and Acellular Pertussis (TDaP)** – One lifetime booster as an adult is required. The TDaP vaccination was first available in 2005.

- **Varicella (Chicken Pox)** – Proof of 2 vaccinations at least 28 days apart OR proof of an immune Varicella antibody titer is required. Having the disease as a child is **NOT** proof of immunity.

FYI – All students are eligible for free Flu vaccinations from IUPUI Campus Health/Student Health each season.

Since the above immunizations are required by the Indiana State Department of Health for 12th grade students in Indiana, Campus Health expects that you most likely have already had them. If you have not had them, you may get them from your PCP or you may come to one of our two Campus Health/Student Health clinics. If you come to one of the clinics, you will need to present a valid JagTag. No appointment is necessary. Please also bring your insurance card with you. We may be able to provide the vaccines, at no out-of-pocket cost to you, if we are in your insurance network. We are in-network for insurance for the majority of IUPUI students.
Campus Housing Immunization Checklist

Name (PRINT LEGIBLY): ___________________________ Date of Birth: ___/___/___

Gender: M / F Student ID#: ___________________________ Phone: (___)____________________

Move In Date: ___/___/_____ University Email: ___________________________

Declaration Statement

IUPUI Campus Health and the School require you to provide documentation of the following vaccinations at least 60 days prior to move in. **Failure to submit the appropriate documentation may prevent your ability to remain in campus housing the following semester.** We highly recommend you submit your documentation as soon as you are aware you will be living on campus. We are not responsible if you submit documentation at the last minute that does not meet requirements.

**Copies of clinical records MUST be attached for each vaccine dose or lab test **

**MMR (Measles, Mumps, Rubella):** TWO doses are required at least 28 days apart OR a positive antibody titer (IgG) for each

Vaccinations: #1  #2  OR  Evidence of Immunity: Measles Titer  Mumps Titer  Rubella Titer

**TDaP (Tetanus/Diphtheria and Acellular Pertussis):** ONE adult dose first available in 2005 is required within the last 10 years

Vaccination: #1

**Varicella (Chicken Pox):** TWO doses are required at least 28 days apart OR a positive antibody titer (IgG)

**Note: Having the disease as a child is not proof of immunity**

Vaccinations: #1  #2  OR  Evidence of Immunity: Varicella Titer

INCOMPLETE PACKETS ARE NOT ACCEPTABLE
You will be contacted via email once your documentation is received and reviewed.
IUPUI Campus Health Patient Portal Pre-Registration

It is important that the steps below are completed in chronological order.

PLEASE NOTE: If you have already been a patient at our clinic, you do not need to pre-register. To web-enable your account, either send an email to healthsv@iupui.edu or call 317-274-8214 with your request. Once web-enabled, you can review and/or update your information following steps 3 – 6 below.

1. Pre-Register as a patient by going to IUPUI Campus Health’s Patient Portal using the following link: https://health.eclinicalworks.com/IUPUCampusHealth. Click the Pre-Register button.

2. Fill out the starred demographic information in all three tabs and click ‘Submit’ when finished. You must provide an iupui.edu, iu.edu, or indiana.edu email address during registration to be web-enabled! If you do not have an iupui.edu, iu.edu, or indiana.edu address, enter your current email address and skip to step 6.

3. IUPUI Campus Health will process your submitted registration, which may take several days. After your registration is complete, IUPUI Campus Health will send you an email with your username and temporary password to log into the IUPUI Campus Health Patient Portal. Once you receive your portal access credentials, log into the Patient Portal to complete the next step. Your temporary password will expire in 48 hours. If your password expires, either send an email to healthsv@iupui.edu or call 317-274-8214 requesting it be reset.
4. When logged into the Patient Portal, click “Immunizations Given in the Past” under Questionnaires located on the left hand side.

5. Complete the date fields (free text or use the calendar) next to the vaccines that you have received. Leave date fields blank if you have not had that vaccine. When finished, click Submit. (Any titers and/or additional vaccinations will be entered by our office once your completed immunization packet and supporting documentation are received.)

6. Print and complete the applicable “Immunization Checklist”, and then fax the checklist and all supporting documents to 317-278-6929 or scan to healthsv@iupui.edu. Please be sure to include your last name, first name, and Campus Housing in the subject line. You will receive an email once your documentation is received and reviewed.
